

REPORT OF MASTER THESIS REVISION

Full name: Nguyen Khanh Linh

Class: MBET-1B

Cohort: 2024 – 2026

Date of thesis defense: 06/06/2026

Thesis title:

- + Tiếng Việt: Nghiên cứu đặc điểm phân tử của bệnh võng mạc tách lớp và bệnh Norrie ở trẻ em miền Bắc Việt Nam.
- + Tiếng Anh: Study on the molecular characterization of Retinoschisis and Norrie disease in children from Northern Vietnam.

Supervisor: Assoc. Prof. Dr. Nguyen Hai Ha, Dr. Hoang Van Vinh.

I hereby declare that I have revised my master thesis as required by Master Thesis Examination Committee:

Point	Requirements by the Committee	Detailed revisions	Pages
1	The lack of detailed clinical data for patient FEVR031 limits the ability to fully interpret the molecular findings and discuss the clinical characteristics of this particular case.	The clinical data of patient FEVR031 has been added and there were more discussion for the molecular findings. The genotype-phenotype correlation evaluation for ND was initially evaluated.	34, 35, 55, 57, 58

2	Several formatting and editorial issues should be corrected before final submission: there are inconsistencies in table numbering and referencing. The thesis alternates between Arabic and Roman numeral formats and does not consistently capitalize the term "Table".	The inconsistencies in table numbering and cross-referencing have been carefully reviewed and corrected throughout the thesis. The cross-references were all numbered consistently using Arabic numerals and capitalized.	27, 28, 34
3	The List of Tables and List of Figures are combined into a single section. For improved professionalism and readability, these should be separated into two independent lists.	List of Tables and List of Figures were separated into two different pages. Thus, Contents of thesis were updated.	iv, v
4	Several reference forming errors were identified, including an instance where author names were merged without proper punctuation.	The reference list has been carefully reviewed and corrected. In case the author names were merged, it was replaced by correct format such as "Sudha et al, 2017".	11
5	Minor typographical and grammatical errors are present throughout the document.	Minor typographical and grammatical errors have been revised.	14, 15, 34, 59

6	The Abstract and Conclusion sections have not yet fully highlighted the most prominent research results.	The Abstract and Conclusion sections have been edited to highlight the protruding results.	viii, 59
7	Figures and figure captions need to be formatted to fit within the same page.	Figures and figures captions have been fitted within the same page.	56
